Installation Guide And Data Information:

EcoQuilt Expert

**Keeps your loft space
approximately 15 degrees
cooler in the Summer**

**Completely Non Toxic
and Non Irritant and
100% Recyclable**

**Built In Vapour Control
Layer will help reduce
condensation when fully
taped and sealed**

**Great for Keeping
Conservatories Cooler In
the Summer and Warmer
In The Winter**

General Fixing And Instructions:

- **When fitting EcoQuilt in either a Loft, Wall, Floor, Garden Building or Conservatory it is vital that a 25mm air gap (batten) is present either side of the EcoQuilt. This will allow the material to Reflect and will also stop any Cold Bridging. You must also ensure that all overlaps, cuttings and the perimeter is fully taped and sealed using Thermaseal True Aluminium Foil Joining Tape.**
- **EcoQuilt must be installed with a 50mm overlap, and fixed in place using 14mm staples at regular intervals.**

Relaxed Thickness:	15mm
Compressed Thickness:	6mm
Thermal Resistance:	Approx. 2.272
Weight:	400g m²
Length:	1500mm
Width:	10m
Components:	6 Layers of Foil and Wadding
